Model de rezolvare a temei

1.

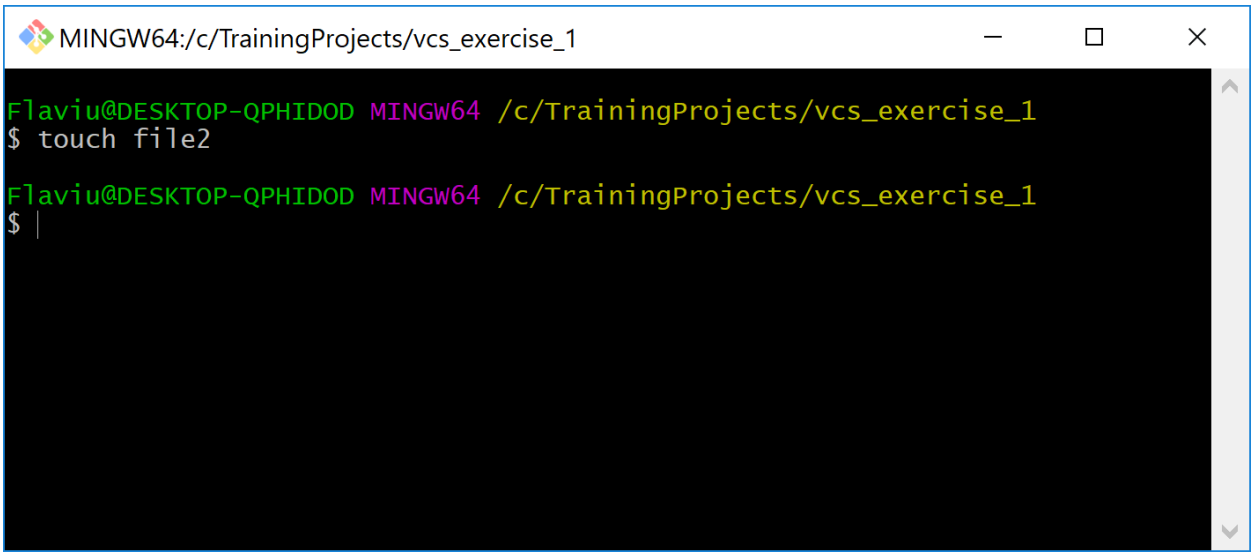

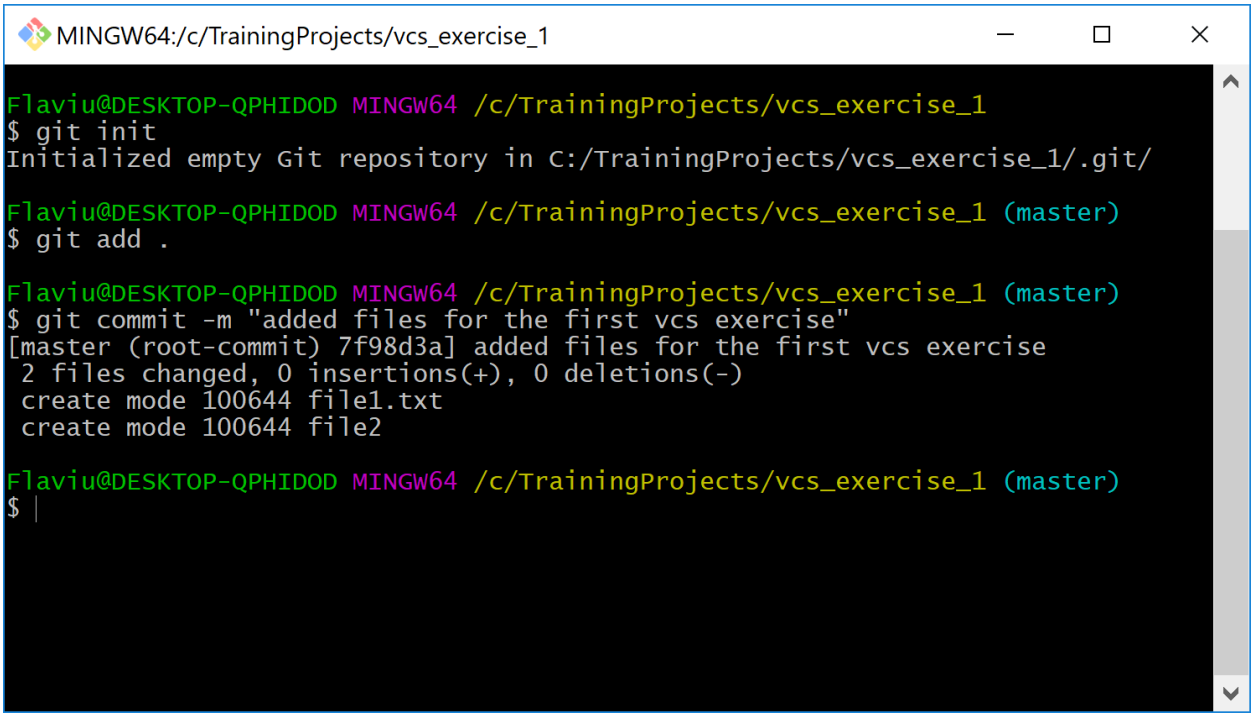

Adăugați și conținut în fișierele txt (orice text)

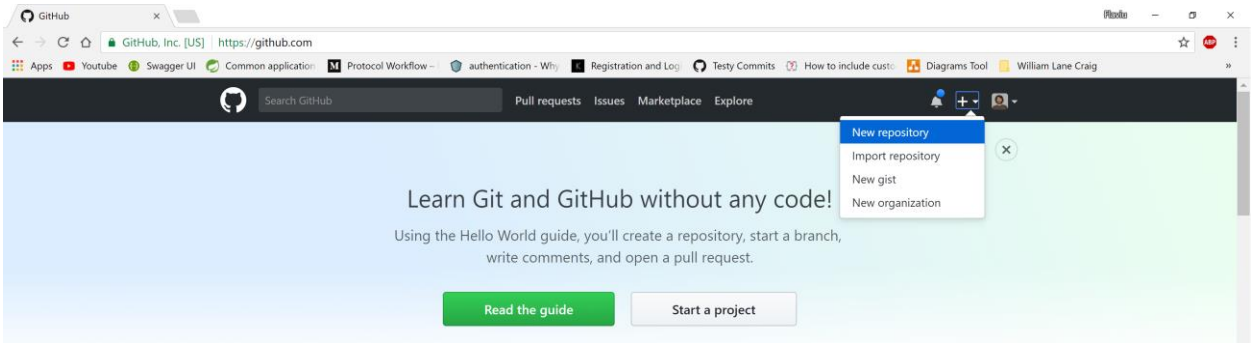

Deschideți un terminal, navigați până în directorul proiectului curent (vcs_exercise_1) și introduceți comanda touch urmată de numele fișierului pe care doriți să îl creați.

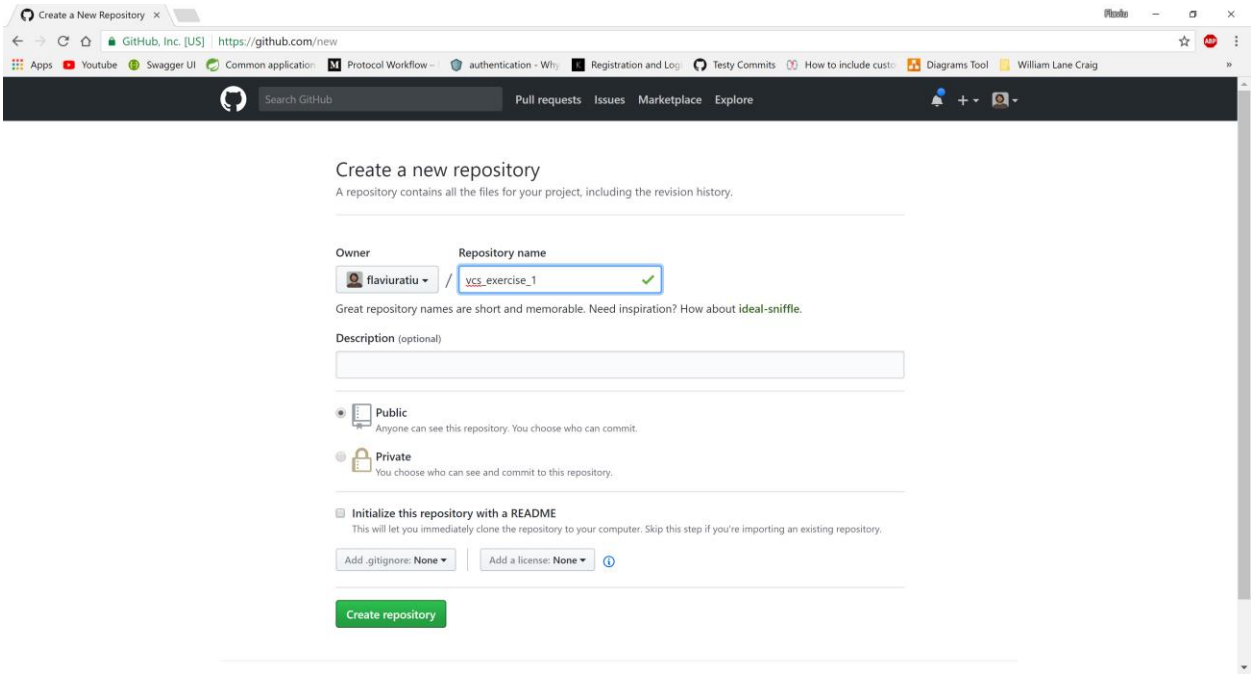

2-4

Create a new repository
A repository contains all the files for your project, including the revision history.
Owner
Repository name
flaviuratiu
vcs_exercise_1
Great repository names are short and memorable. Need inspiration? How about ideal-sniffle.
Description (optional)
Public
Anyone can see this repository. You choose who can commit.
Private
You choose who can see and commit to this repository.
Initialize this repository with a README
This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.
Add .gitignore: None
Add a license: None
Create repository
